

# QZKCoin Guide: Everything you need to know about it

## Introduction

The current world is surrounded by cryptocurrency, our journey is about making payment gateway easily for unaware countries like Pakistan, QZKCoin is our big accomplishment in this perspective.

QZKCoin is a kind of cryptocurrency that is launched in the crypto market by Qazeek pay, to ease the payment gateway for people around the globe, it also aims at providing payment Management Services, and allows people around the globe to make safe and secure transactions.

QZKCoin is a peer-to-peer cryptocurrency that allows the user to directly exchange it with individuals and parties without involving any mediator, the architecture behind QZKCoin is the decentralized Blockchain, which allows people to have all the records of their data on their own without depending on others.

It holds multiple benefits for people, which will increase the surge in demand for QZKCOINs.

## Problems

Need is the reason behind every development, to overcome the problems people face due to the PayPal payment gateway, we started this journey.

Several countries, do not have the facility of PayPal, also considering PayPal flaws like they can block your account in case you are having a large balance in your account.

QZKCoin does not work in this manner, it ensures the security and safety of the digital assets of people.

## Benefits

- It has great benefits for investors, as they are currently pricing low because of the less awareness among people, investors can buy it now and enjoy the benefits in the future.
- QzkCoin is listed on exchanges like Dex-trade, Koinbazar, and CoinGecko, which generates an open opportunity for people to buy it for short-term and long-term investments.
- QzkCoin has a lower inflation risk due to its decentralized Blockchain which allows people to have it without worrying about the loss in its value, Blockchain will never face its end in the future.
- To highlight its benefits, QZKCoin is built on mainnet framework which ensures its authenticity and made it out of the list of scam coins.
- Its market supply is low which means it holds great revenue for the early investors and its sales are increasing and are most likely to evolve your trade business.

## Usability

- QZKCoin has numerous long-term uses, traders can trade through it around the globe with full confidence.
- People can perform their daily-life transactions as well as their business transactions around the globe without any doubt because every transaction they made is recorded permanently.

- QZKCoin can be used to perform Payment Management Services for e-commerce and business which will enhance its user community.
- QzkCoin can also be used to buy products or services online, without any central control.

### Tokenomics

It is important to know QZKCoin's allocation criteria which will help people to make up their minds about having it, here are the simple percentage criteria which highlight its allocation.

The **Private Sales** of QZKCoin are at 33% so far, we **Locked** it to 24% to give full confidence to our investors because we believe that financial success is achieved by providing loyalty and confidence to our investors and buyers.

The **Initial Exchange Offering** (IEO) utilized 22%, and the **Marketing** percentage is set to 8% which we utilize in influencer marketing to generate great revenue, for our **Development Team** we fixed 5% for all the development and future maintenance.

Whereas 3% is reserved for the **Founder**, and 3% for **Listing** which will utilize in enlisting it to exchanges, and 2% is reserved for **Airdrops** which we are likely to perform in the 3<sup>rd</sup> quarter and next one shortly.

### Roadmap

We believe in long-term success for QZKCoin, we are truly dedicated to accomplishing its roadmap within the specified period.

So far second quarter of 2021, we completed the plan as well as the development of QZKCoin, and also launched it to the cryptocurrency market on 15<sup>th</sup> June 2021, In the third quarter of 2021, we listed it in the Koinbazar exchange and the CoinGeck, we are hoping to enlist it in the **Coin Market Cap** (CMP), and working on its Whitepaper launch.

In the fourth quarter of 2021, we are optimistically working to enlist QZKCoin in several big exchanges.

We planned the first quarter of 2022, utilizing the complete % of our Airdrops, and work hard to enlisting QZKCoin in several well-renowned and huge exchanges of the world.
